

Smart Living

starts with Somfy

Smart Living

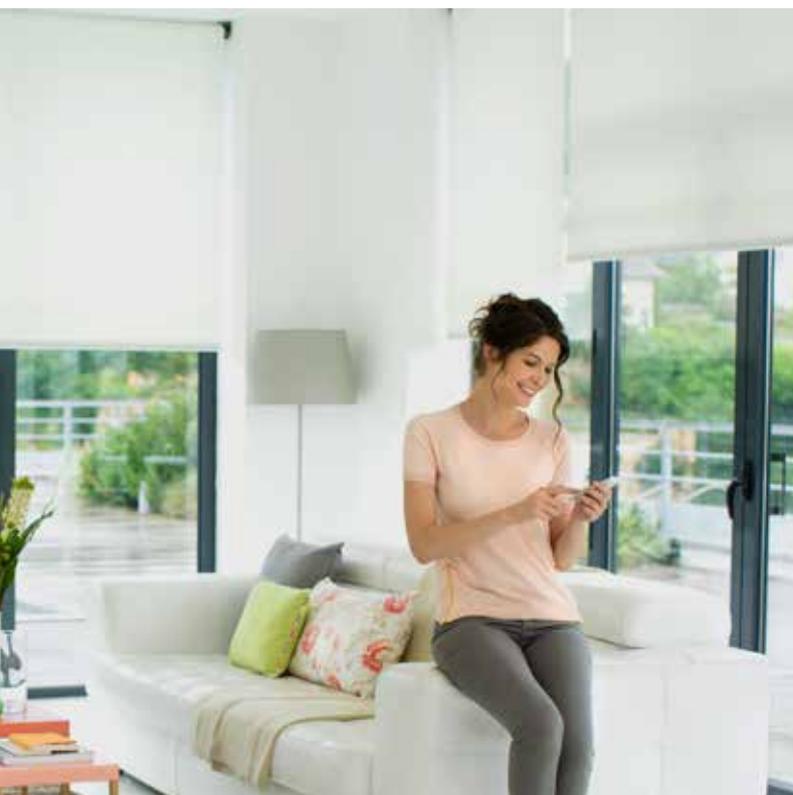

starts with Somfy

Somfy Smart Home puts you in control, makes your life easier, more comfortable and gives you peace of mind, wherever you are. Monitor and operate blinds, curtains, lights, electrical equipment, heating, garage doors and gates with your smartphone or tablet. You can adjust everything about the Somfy Smart Home System to accommodate your personal preferences and you can monitor and operate it from anywhere in the world. Keep an eye on your home using cameras and movement detectors for home surveillance, for great peace of mind.

Somfy TaHoma is a smart box and the heart of your Smart Home. It links you to your home via the smart TaHoma app. Somfy Smart Home solutions are extremely easy to use and can be installed with very little trouble. You can add products whenever it suits your needs or your budget. Somfy Smart Home gets the most from your home with the least possible effort.

Smart living starts with Somfy Smart Home.

Always connected to your home with

Enjoy a relaxing day at home, while keeping your room cool in summer and warm in winter!

Control your blinds and curtains with your smartphone. Create scenarios for your favourite settings involving your blinds, curtains, interior lights and heating. With one click your entire home is set to the right ambiance. Check and adjust blinds or curtains remotely to keep your home cool in summer, retain heat in winter or make your window coverings even smarter by adding temperature or sun sensors and let your blinds and lights react to circumstances automatically.

Comfort

Peace of mind

Easy living

Easy, smart & comfortable living at home

Program your home to create your ideal living environment, any day. When you wake up your curtains open automatically, the lights turn on and the heating system switches to COMFORT mode. When you leave, all lights turn off and the heating is set to ECO mode. Your home will come to life again when you arrive back home: lights will turn on and the roller shutters, blinds or curtains will close to keep the house cosy and warm. Enjoy a system that reacts at the touch of a finger or even automatically!

Efficiency

Easy living

Peace of mind

Somfy Smart Home

Close up your home with one click on your smartphone

Link your lights, rollershutters, gate and garagedoor together in a 'leave' scenario and Somfy Smart Home will take care of everything. The roller shutters close, all the lights are turned off and the gate & garage door automatically close behind you. Your youngest has forgotten his house keys? The postman wants to leave a parcel? Relax! You can open your garage door remotely from your smartphone. Smart living starts with Somfy!

Comfort

Peace of mind

Always keep an eye on your home

Where and wherever you want, you can check on your home. Through the app you can switch on the lights or open the curtains, giving the impression that the house is occupied to scare off intruders. You can also keep a close eye on your house with sensors or cameras. If anything unexpected happens you will be alerted immediately by a push message that is sent to your phone. If you are not in the position to check on your home yourself, your selected neighbors, family or friends get a push message too, so immediate action can be taken. Somfy smart home gives you peace of mind and a sense of safety.

Peace of mind

Easy living

More comfort and peace of mind thanks to Somfy Smart Home

Easy & smart living

Control and monitor your blinds, curtains, lighting, heating, awning, garage door, and gates with smartphone, tablet or computer from anywhere, anytime.

Personalised to your needs

Create scenario's for waking up, leaving the house, going to bed and more. Involving multiple connected products and let TaHoma run your home according to your personal preferences.

Effortless and smart controlling

Add weather or opening sensors to effortlessly and automatically control your home. Just programm your preferences and TaHoma will do the rest. Smart!

More peace of mind

Remotely or whenever you want, make sure everything is OK at home and adjust your equipment whenever you want.

Keeping an eye on your home

Automatic surveillance and recording of events thanks to the camera.

Scare of potential burglars

Clever home presence simulation turns your lights on an off at set times, to create the illusion that somebody is home and scare of potential burglars.

Receiving alerts

If there is an intrusion, or smoke detection, an alert is sent to your smartphone. Now you can take immediate action.

Active protection

If there is an intrusion, the equipment connected to TaHoma® simultaneously activate to protect your home (rolling shutters close and lights turn on).

CLIMATE CONTROL

SECURITY & SURVEILLANCE

ACCESS

BLINDS, CURTAINS, AWNINGS AND SHUTTERS

LIGHTING & SWITCHING

Always connected to your home, wherever you are, from your smartphone, tablet or computer.

Enjoy an **easier life** with Somfy TaHoma

The TaHoma is the beating heart of Somfy Smart Home. This smart box not only allows you to control individual products remotely via smartphone, it also enables you to create scenario's involving groups of products and connects you to your home at all times. Just connect the box to the internet via the supplied cable, activate the box online via www.somfy-connect.com, install the free app on your smartphone and link your products. It's that easy! Now you're ready to live smarter.

EASY

- Easy to install, no need to break walls or lay cables, all products are wireless
- Easy to use, with an intuitive user interface designed with and for users*
- Instant access to your home, wherever you are in the world. If necessary, a warning message to your phone alerts you to check on your home and deal with unexpected incidents.
- Fixed price, no monthly subscription fees, or costs for receiving alert messages

SMART

- Just one remote to control all the connected equipment in your house, your smartphone!
- Create your own scenario's with multiple products that suit your way of life or let your home react automatically to the (weather) circumstances by using sensors
- Hacker proof: your personal information stays personal while somfy uses its own extremeley well protected server that has been full tested to be hackerproof (SysS Award)

COMPLETE

- Broad range of products: all somfy motors for blinds, curtains, awnings, roller shutters, garage doors, gates and Somfy Smart Home products for lighting and security are compatible with TaHoma.
- Multiple brands: Add products from Somfy partners to make your smart home even more complete: Philips Hue lights, Thermostats (Honeywell and Danfoss), Airconditioning (Hitachi) and Velux roof windows.

A **smart** and **intuitive** interface.

You choose how to control your smart home: by smartphone, tablet, computer or your connected watch.

TaHoma®

3 simple and intuitive menus

SCENARIOS

Create your own connected life moments

- Specify simultaneous operation of several connected products.
E.g.: "let's go" scenario which closes all roller shutters and roof windows and turns off the lights when you leave home.
- With the touch of a finger, activate any scenario you want.

AGENDA

Create your own scenario schedule to suit your weekly lifestyle

- Create your typical days.
E.g.: day at work/home with several scenarios that can be activated at once or after a delay (up to 20 different typical days).
- Programme a week with different days.
E.g.: "working days" from Monday to Friday and "weekend days" Saturday and Sunday.

SMART

Establish individual scenarios

- Make your home even smarter with sensors to optimise efficiency of your connected equipment with sun, temperature, opening, smoke or presence sensors to trigger individual products or full scenario's. For example, if the smoke sensor detects smoke, your rollershutters automatically open and the lights turn on for a safe passage way.
- Create conditional scenarios. For example, if the weather sensor detects a certain temperature, shutters,awnings, blinds or curtains will automatically close.
